

Busmark CAIO body

For further information: 011 412 2927 www.busmark.co.za

Technical Specifications

STANDARD EQUIPMENT

Construction:
Bodywork is of tubular steel construction, "Chromaprep" steel sheeting and G.R.P. manufactured front and rear domes. Super-structure will comply with the requirements of SABS 1563:1992 (Rollover protection). The workmanship shall be of the highest quality and finishing as required by both your and Departmental inspectors.

The vehicle body offered will comply with the requirements of the "Compulsory Vehicle Standard" issued by the SABS; and the Road Traffic Act No.29 of 1989 and Regulations as updated.

Two external rear view mirrors.

Mud flaps – all wheels.

Windscreen wipers plus windscreen washer.

Spare wheel carrier – as supplied with chassis.

Swing out battery carrier in separate lockable body side locker, incorporating a toolbox.

Front bumper and rear bumper GRP moulded.

Number plate holders.

Interior ceiling lights.

Slam type passenger door in front overhang.

SABS approved chevron plate at rear end of body and SABS reflective tape on sides.

STANDARD EQUIPMENT cont.

Painting:
Exterior body is prepared with Durathane K etch primer and the finishing coat in Durathane K enamel in white.

Rust proofing/Corrosion protection for 3 years:
Corrosion protection in the window openings in the framework and application of a good quality water repellent sealer between the window frame rubber and the bodywork.

All hollow steel sections are dipped in acid to remove scale, washed in clean water and dipped in a self etching primer. Tectyl 506EH is sprayed on the outside of the framework and inside hollow sections before outside cladding is applied. An etch primer is applied to all surfaces where steel makes contact with steel. The undercarriage is rubberized with Tectyl 121B.

Windows:
Material used for windscreens – Laminated Safety Glass – Clear. Material used for other windows – Toughened Safety Glass – TINTED. Side windows – aluminium frames front to back sliding type. Windscreens will be the curved, panoramic type.

The complete dashboard console, lamps and electrical equipment will be stripped from the cab/cowl and reinstalled in the bus.

The entire floor will be covered with a PVC-based flexible sheeting designed for critical high wear applications. The wear surface incorporates a heavy emboss ensuring excellent non-slip properties. The floor covering will be standard PVC welded at seams to stop ingress of water.

The entrance steps will be illuminated with a step light.

Modesty screen and partition behind driver.

Two sunvisors.

STANDARD EQUIPMENT cont.

Full length hand rail.

2.5 Dry Chemical Powder fire extinguisher.

Heater demister for windscreen.

Individual Split-back seats in Cloth or vinyl

The seat frames shall be of steel tubular construction, powder-coated, and will be supplied and fitted in accordance with an approved layout. Seats will be designed to provide the best comfort and safety features. All seats have been tested in accordance.

WARRANTEE

We offer a warrantee for bodywork only in respect of faulty workmanship or material for twelve (12) months and 3 years on the body structure & anti-corrosion of unlimited mileage from date of delivery. The bus will conform to all South African safety and Road Traffic Regulations.
